Forrest,

I reviewed the NM plan and consider the concept and approach to be very good. I think the use of multiple lines of evidence makes this a solid approach. I came up with about a half-dozen comments as I went through the document, but after I read section 6 Recommendations and Future Directions, everything I had mentioned was addressed. Bottom line is I think this is a well thought out approach given the limitations that exist, and it should go forward.

Russell

Subject: Fw: NM Nutrient Analysis Plan

Forwarded is the final NM nutrients proof-of-concept paper developed by Tetra Tech. This is the final document so please review at your leisure but make sure you review since I am pursuing additional funding (N-Steps and OW) to fully implement the original scope of work which the proof of concept helped flesh out.

Cheers

Subject: NM Nutrient Analysis Plan

Hi all;

Here is the NM nutrient analysis plan and proof of concept. Thanks for your comments. I tried to address them all, though some will have to wait until the full analysis and report. Please be in touch with any additional comments so that we might be able to incorporate them during the next phase.

It has been great working with you!
